DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-6, 10-21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaufman et al. (US 4,970,457).

With respect to claims 1, 11, 12 and 18, Kaufman discloses an MR pulse sequence designed to reduce induced RF power with multi-phase flip angles comprising: an initial contrast preserving phase having a number of pulses with relatively high flip angle that is relatively constant over the initial contrast preserving phase (Column 12, lines 1-6); and a ramp down phase having a number of pulses with a flip angle less than that of the flip angle of the number of pulses in the initial contrast preserving phase and that decreases over time (Column 12, lines 52-66).

- 3. With respect to claim 2, Kaufman discloses at least a first pulse in the pulse sequence is applied having a flip angle greater than that of the flip angle applied in the initial contrast preserving phase (Figure 3).
- 4. With respect to claims 3 and 13, Kaufman discloses the flip angle of the number of pulses in the ramp down phase is decrease in a controlled manner (Column 12, lines 52-66).

Application/Control Number: 10/612,596 Page 3

Art Unit: 2859

5. With respect to claims 4-6, 14-17, 19-21 and 23, Kaufman discloses a relaxation prolongment phase having pulses with flip angles that increase in value wherein said prolongment is set not to exceed a given maximum or constant value (Column 12, lines 1-66).

6. With respect to claim 10, Kaufman discloses the flip angles of the pulses of the ramp down phase decrease by a linear function; an apodization window function and a monotonic function (Column 13, lines 41-66)

Allowable Subject Matter

7. Claims 7-9 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dixomara Vargas whose telephone number is (571) 272-2252. The examiner can normally be reached on 8:00 am. to 4:30 pm..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
